## WORK HISTORY

### APPLICATION DEVELOPMENT ANALYST

09/2022 to Current

Accenture Solutions Pvt Ltd, Kolkata, India

- Handled all phases of Software Development Life Cycle.
- Created software applications utilizing Core Java, JDBC, JPA, OOP, Spring MVC, and Spring Boot.
- Refined code to address security vulnerabilities and resolve sonar issues.
- Transitioned application to Java 20 for improved compliance with business and security protocols.
- Developed SQL queries for effective data extraction.

- Refined legacy code to align with the latest Java updates.
- Collaborated with RESTful APIs for external communication.
- Leveraged Maven for application deployment on WebLogic and Rancher.
- Managed version control systems using Git and GitLab.
- Debugged code for client requirements.
- Assessed system functioning against user needs for quality assurance.
- Exhibited expertise in bug resolution, requirement analysis, and the development of Technical Design and Mapping Documentation.
- Diagnosed and fixed software problems.
- Wrote complex SQL queries to address data manipulation requirements.
- Compiled technical documentation including system architecture diagrams, flowcharts, maps.
- Reviewed current codebase to ensure alignment with best practices.
- Identified improvement opportunities in current applications and suggested solutions to boost efficiency and performance.
- Monitored production systems for errors or anomalies needing corrective measures or further investigation.
- Contributed to successful project outcomes by providing technical expertise throughout the development process.
- Mentored junior team members, fostering an environment conducive to skill growth and knowledge sharing.

## **APPLICATION DEVELOPMENT ASSOCIATE**

*08/2021 to 08/2022*

Accenture Solutions Pvt Ltd, Kolkata, India

- Delivered effective support to end-users by troubleshooting and resolving Application/API issues, minimizing downtime and boosting productivity.
- Managed Change Requests and configured jobs for smooth integration across various Enterprise Applications, including SAP, Ariba, and GRW.
- Executed thorough testing procedures such as API testing to lower software defects and increase end-user satisfaction.
- Created detailed Unit Testing and Regression Testing documents.
- Carried out multiple Cut-Over Activities during Market Go-Live ensuring a seamless transition.
- Aligned Mapping Query Changes with business needs.
- Researched emerging technologies and industry trends.
- Collaborated closely with fellow developers to address complex technical challenges in application development.
- Provided software support and technical solutions covering operational, database, and security aspects of applications.
- Facilitated mentorship programs to accelerate onboarding process.
- Led the integration of third-party APIs expanding application functionality and interoperability with other systems.
